Marriage Index 1

PREFACE

A primary objective of the Ohio Genealogical Society is to develop vehicles for the dissemination of genealogical information to its membership and to the genealogical community at large. The OGS marriage book series focuses on this objective.

The first marriage book, published in 1996 by Jean Nathan and her committee, provided an initial statewide index of early Ohio marriages to the end of 1820. The second book in the series, ***Ohio Marriages Recorded in County Courts 1 Jan 1821 - 31 Dec 1830: An Index,*** is being published during the Ohio Bicentennial Year of 2003.

On behalf of OGS, I wish to extend my heartfelt thanks to editor Jean Nathan, to database manager Ron Stroup, and to the many, many statewide volunteers who assisted in producing this important genealogical resource. The Ohio Genealogical Society and all Ohio researchers owe a debt of gratitude to you for providing them with this publication.

INTRODUCTION

by Jean Nathan

Purpose

The purpose of this project is to collect and publish all court recorded marriages performed within the State of Ohio from 1 Jan 1821 through 31 Dec 1830. The aim is to provide a quality statewide research tool for all researchers. The dates were chosen to limit the project's scope to manageable proportions. The decision was made not to include newspaper accounts and other non-court records. Only records from original or microfilmed copies of originals were used.

Background

The idea to index Ohio court recorded marriages is credited to Jeanne Pramaggiore, Past President and Past Chairman of the Board of The Ohio Genealogical Society. The project began under her presidency and originated under the capable direction of Beverly Schumacher.

By 31 Dec 1830, 66 counties had been organized in Ohio. Of these, 63 are included in this index. Monroe and Seneca counties had courthouse fires which destroyed their early records. Licking County also had a courthouse fire which destroyed many of the marriage records. Delaware and Richland counties had some early records covering this time period misplaced or lost.

The information in this index was copied from county court records, entered into a database, proofread, corrected and proofread again. Included is a chart listing what records were used. The year given under the county name is the year the county was organized and began to function. Most, if not all of these records, are available on film through your LDS Family History Center. In some cases, the films are available at the Ohio Genealogical Society Library in Mansfield, Ohio. These films are indicated on the chart.

Use of this Index

This book is intended to be used only as an index, a tool for doing research. It is not a primary source of evidence. If you find a name or names that interest you, go to the original record, which is the primary source. The original records can be found either at that county's courthouse or archives, or on film at an LDS Family History Center. Be sure to make a copy. In some cases, additional information, such as age or residence, may be found. In most cases, the name of the person who performed the marriage is given. If the marriage was performed by a religious official, determine the religious official's church through the use of city directories and county histories. Once the name of the church has been determined, efforts should be made to locate the church records. If the family remained in the area, many other family records may be found at the same church.

Format

All data was copied exactly as it is listed in the record, including obvious errors, e.g. 30 Feb 1819. No judgments were made as to what the record should be. When a record was not clearly legible and there were two or more possible interpretations, a separate entry was made for each possibility. Particular attention was given when the first letter of a surname was in question. An example follows:

Sick, John	Doe, Mary	27 Sep 1813	RICH	001	001
Lick, John	Doe, Mary	27 Sep 1813	RICH	001	001

The index consists of six fields of information:

Field 1 is an alphabetical list of brides and grooms.
Field 2 is the name of the spouse of the person in Field 1.
Field 3 is the date of marriage, if it was indicated. An "L" after the date indicates date of license. An "R" indicates date recorded. The date recorded is not necessarily the date of the event.
Field 4 is the first four letters of the county name.
Field 5 is the book or volume number.
Field 6 is the page number.

Key to Abbreviations

A question mark (?) following a name indicates there was a question about the spelling of that name. Dashes (----) indicate missing or unreadable information. An asterisk (*) indicates a person of color. On the marriage records source chart, DAR indicates marriage records recorded by the Daughters of the American Revolution. They are typed transcriptions of the original records.

A Word of Caution

Many times, ministers, justices of the peace, and others who were permitted to perform marriages never made it back to the courthouse to record all the marriages they performed. If a marriage for which you are looking does not appear in this index, do not immediately assume that the persons were not married in Ohio. Check additional sources such as church records, newspapers and family Bibles.

On the other hand, a marriage appearing in this index may never have actually taken place. Sometimes a couple applied for a marriage license, but, for various reasons, never married.

VOLUNTEERS

Numerous hours were contributed by our many volunteers. We recognize the sacrifices these people made, and thank them for their dedication to the project. Their names are listed below. Please look over this list and express your appreciation to those you know.

Names of volunteers were requested as each county was completed. However, any time a list of names is given, it is inevitable that someone is missed. For this, we apologize and express our sincere appreciation to those volunteers, also.

I would like to extend special gratitude to the following people: Sunda Peters and the volunteers from MAGIC (Mohican Area Genealogists Interested in Computers) for their efforts to complete the final counties; Ron Stroup for again combining all the pieces into one workable index; Paul Bates who completed the data entry step for numerous counties; Kay Hudson and Tom Neel for adding the final touches.
